

FCC:

I am a speech pathologist. I do not want to hear the "F" word on public TV. Do you realize how damaging that will be to our youth? I work with lots of autistic children and we try so hard to keep them away from foul language, because they mimic what they see and hear. This will add to our frustration. While you are at it, I hate hearing "God" used all the time as well as 'ass' and others that you let creep in. Can't we keep our airways somewhat tame?

Thank you, April Hochstrasser PhD
